Welcome to the virtual home of the East African Cables Group.

As part of our commitment to enhance our corporate communications and customer relations service, the virtual home of the East African Cables Group has recently received a facelift. This facelift features a new easy to navigate design and provides an interactive platform to engage with all our stakeholders online.

From the heart of Sub Sahara Africa, East African Cables Group has for more than four decades now maintained a heritage for the production of quality cables and conductors. We have tremendously expanded our production capacity to cover the full range of aluminium and copper cables and conductors.

As a manufacturing group firmly anchored on world class benchmarks and with production facilities in Kenya and Tanzania, the East African Cables Group is today a total cabling solutions provider. We pride ourselves at being in a coveted position to manufacture and supply a broad spectrum of cables and conductors in a number of African countries.

Our range of products effectively helps, in connecting lives via quality cables for just about any type of electrical or telecommunication application. We have also established mutually beneficial alliances with global peers to enable us provide specialized cables such as data and fibre optic cables.

Such alliances also help us deliver world-class electrical accessories to complement our manufactured range as part of our commitment to provide value for our customers.

To find out more about us, please surf through the pages. We also welcome all your online queries while thanking you for your continued support!

Paul Muigai
